

Jonathon Gilliam

Web Development Opportunities

👤 Profile

Hi, my name is Jonathon Gilliam and I'm a full stack web developer with a strong passion for creating innovative solutions that meet the needs of users. I'm currently enrolled in a BA program for software development and have gained a lot of experience with various frameworks throughout my studies. In addition, I work as a technician at Amazon where I practice my web development skills on a daily basis.

I'm a dedicated learner who's always striving to improve and stay up-to-date with the latest technologies and trends. As a member of the Army National Guard, I'm used to handling challenges and taking on new responsibilities with a positive attitude.

Whether it's front-end or back-end development, I'm confident that I have the skills and determination to tackle any project that comes my way. I'm excited to continue growing as a developer and to contribute my knowledge and expertise to create impactful solutions for users.

📁 Employment History

91D Mechanic at Army

January 2020 — July 2025

As a 91D in the Army, you are a small arms/artillery repairer responsible for maintaining and repairing various weapons systems, including rifles, pistols, machine guns, grenade launchers, mortars, and other related equipment. You will inspect, diagnose, and repair weapons, as well as perform routine maintenance and prepare weapons for deployment. In addition to your technical skills, you will also be responsible for managing and maintaining accurate records and documentation for all weapons systems under your care. As a 91D, you will need to be detail-oriented, disciplined, and able to work well under pressure in a fast-paced and challenging environment.

Senior Technician at Amazon, Seffner

July 2020 — May 2023

As an RME tech 3 at Amazon, my job is to maintain and troubleshoot complex material handling systems in our facilities. These systems are critical to ensuring that our customers receive their orders on time and in good condition, so my role is crucial to keeping our operations running smoothly.

In my day-to-day work, I perform preventative maintenance on equipment and systems, as well as diagnose and repair any issues that arise. I use a variety of tools and software to monitor the health of our systems and to identify potential issues before they become major problems.

In addition to my technical responsibilities, I also work closely with other members of the operations team to ensure that our systems

are meeting their performance metrics and to identify areas for improvement. I also collaborate with our vendor partners to ensure that we are getting the best possible service and support for our equipment.

Overall, my role as an RME tech 3 at Amazon is a challenging and rewarding one. I enjoy the technical complexity of the work and the satisfaction of knowing that I am contributing to the success of one of the world's largest and most innovative companies.

Personal Project at Personal, Riverview

January 2018 — December 2023

I have been working on several coding projects using the MERN stack as a full-stack web developer. One of my notable projects is a Twitter clone, where I used MongoDB and Mongoose to store user data and implemented Passport for user authentication. I also have experience with front-end development frameworks such as Tailwind CSS and Bootstrap CSS. My proficiency in JavaScript has enabled me to write efficient and high-performing code that meets project requirements. I am constantly learning and implementing new technologies to ensure that my coding skills remain up-to-date with the latest trends in web development.

Manager at Target, Riverview

January 2018 — January 2020

As a Store Manager at Target, I am responsible for overseeing the daily operations of the store, ensuring that it runs efficiently and effectively. I manage a team of dedicated and skilled employees, coaching them to meet their performance goals and providing ongoing training and support.

In this role, I am also responsible for ensuring that the store is well-stocked and merchandised to meet customer needs. I work closely with our vendors and suppliers to ensure that we have the right products on hand and that they are displayed in an appealing and attractive manner.

As a leader in the store, I am committed to creating a positive and inclusive work environment where all employees feel valued and respected. I work to build strong relationships with my team members, and I am always available to provide guidance, support, and encouragement.

Overall, my goal as a Store Manager at Target is to ensure that our customers have a positive and enjoyable shopping experience, while also ensuring that the store is profitable and successful. I am dedicated to achieving these goals through hard work, dedication, and a commitment to excellence in everything that I do.

Education

91D Army Schoolhouse

February 2020 — July 2020

Basic Army school house training where I learned to do my job effectively.

✦ Courses

The Complete 2023 Web Development Bootcamp, Udemy

January 2023 — January 2023
